<sup>1</sup>Hybrid measure: This measure is reported using the Administrative methodology that includes administrative claims data only.

<sup>2</sup>Lower rate indicates a better result.

<sup>4</sup>This measure includes members who have had an asthma ED visit that may have resulted in an inpatient admission.

<sup>7</sup>The methodology for Readmissions within 30 Days was modified for CY 2018. The new methodology has been updated to account for readmissions that occurred in January for December discharges, resulting in slightly higher overall statewide rates for the two measures. The rates for CY 2017 have also been updated using the new methodology.

<sup>15</sup>Rates for CY 2018 may have been impacted by the removal of denied pharmacy claims from the rate calculation.
